### JEALOUSY

Prompts Man to Shoot Sweet-heart and Then Turn Revolver on Himself.

SEARON, Pa., Nov. 29.—In jealous rage John Bowen shot and probably fatally wounded his sweetheart, Miss Sarah Davis. He then turned the revolver on himself, inflicting a wound just below the heart that will cause his death. Both were taken to Buhl hospital.

Bowen has been paying attention to Miss Davis for two years. In the evening he purchased a revolver. Meeting several friends on the street, he told them that something would happen within a short time. He went to Miss Davis's home, and after being there for about fifteen minutes, shot Miss Davis.

Screaming and with her clothing afire from the revolver, which had been held close to her left side, she ran to the office of a physician nearby. Bowen then shot himself.

## Oils Soothe Skin Disease

Oil of wintergreen, thymol, glycerine and other healing ingredients compounded in proper proportion into the D. D. D. Prescription has now become the universal favorite of skin sufferers in relieving and curing skin disease. It is a mild wash that penetrates the pores and gives instant relief from all burning and itching. It kills and washes off the gnawing disease germs, leaving the skin free to quickly heal.

D. D. D.—for 15 years—the Standard Skin Remedy

## AS A WOMAN SEES IT

By RHETA CHILDE DORR.

There is much to justify the outcry which has been raised against the Chicago physician who refused to perform the operation which would, temporarily at least, preserve the life of a deformed and mentally deficient new-born infant. The child was so abnormal that if he lived to grow up he would be obliged to live in perpetual seclusion. No school would be possible to him. Association with other children, except perhaps his brothers and sisters, would be out of the question. No means of earning a living would be within his mental or physical power. He would be a burden on his parents, and very likely in the end a burden on society.

Nevertheless, if these were all the considerations, no doctor would be justified in letting the child die. A person might be hideous to look at, a mental deficient, a hopeless dependent, and yet be in himself a justification for living. He might even possess a certain spiritual grace which would make him a blessing as well as a cross to his familiars. It is a known fact that parents are often passionately attached to children who are deformed and imbecile. Cases have been known where the care and responsibility of an atypical child has softened and mellowed the hearts of parents, changing their whole nature for the better.

Every tender and sentimental argument is on the side of allowing the deformed and defective to take their chance with life. Doctors are not infallible. Perhaps the degree of deficiency is not as great as the attending physician may think. Medical and surgical science have taken great strides of late years. Perhaps some means of curing deformities and even of supplying deficiencies may in future be found.

There is just one excuse for the course pursued by that Chicago physician, but it is a very good excuse. The mentally deficient reproduce their kind with quite horrible celerity. They are very frequently oversexed, and their mental helplessness and want of self-control make them easy victims of lust. Four is the average number of offspring of normal parents. The average number born to the feeble minded is nearly double that figure. These offspring are practically certain to be abnormal, and the strain is carried on through an unknown number of generations. It is not a sin to prevent known imbecile infants from living to grow up. It is a simple duty to the human race.

## OIL AND GAS DEVELOPMENT OF TRI-STATE

Latest Reports of Operations in West Virginia, Pennsylvania and Ohio.

In the Dorseyville field, the National Oil and Gas Company drilled its No. 4 on the W. J. Robinson farm a short depth into the lower pay in the 30-foot sand and the well started to flow at the rate of thirty barrels an hour. From 5 o'clock Sunday afternoon to 6 o'clock yesterday morning the well flowed by heads and produced 300 barrels. When drilled deeper into the pay it is expected to increase its production and from its present showing will be good for 600 or 700 barrels a day. With the new well a 600-barrel producer, the National Oil and Gas Company will have a production close to 1,200 barrels a day in the Dorseyville pool.

Operators are now investigating other sections that have not been so closely tested as to discourage the search for a new pool. Near Brandts Church, between the old Ingomar and Wexford fields in Franklin township, Allegheny county, I. F. Schall has taken up a block of leases and is starting a test on the John Fager farm. It is regarded as an important test and the chances for a producer are as good as in any other locality that has not been commenced.

West Virginia. Light wells are the offering in the West Virginia fields. In McKim district, Pleasants county, John Locke and Company drilled a test on the D. D. McCullough farm through the Keener sand and developed a very light show of oil. They give it a shot and will now have a five barrel pump.

On Combs run, Grant district, Ritchie county, Charles Seese and Company have completed a test on the Amos George farm and secured a light pump in the salt sand. On Slab creek, the Imperial Oil and Gas Products Company drilled its test on the H. G. Bayne farm through the Squaw sand and found nothing but a light pressure in the salt sand.

On Dutchman's run, Murphy district, Shaffer and Smathers completed No. 14 on the David McGregor heirs' farm and have a ten barrel pump in the salt sand. On the south fork of Hughes river, Murphy district, Braden and Betts drilled No. 7 on the Thomas E. Davis farm through the salt sand and have a fifteen-barrel pump.

On Gillespie run, Grant district, R. G. Gillespie completed No. 6 on the Russell and Company's farm and has a ten barrel pump in the Keener sand. On Stillwell creek, Clay district, Wood county, the Piersol Oil Company's test on the E. A. McCowell farm is a very light pump in the second Cow Run sand.

Wildcat Duster. On Paint creek, Cabin creek district, Kanawha county, the United Fuel Gas Company has completed its long-delayed test on the Paint Creek Coal and Land Company's tract. The well was drilled through all sands and to a depth of 3,080 feet and found nothing. It was thought that this test might show an extension to the Columbus Producing Company's development on the Williams Coal Company's tract. On Three Mile creek, Elk district, the Ohio Fuel Oil Company has made the location for a test on the W. H. Myers farm.

On Buffalo creek, Lincoln district, Marion county, the Philadelphia Company drilled a test on the J. F. Downs farm through the Big Injun sand and developed a gasser. On Miracle run, Battelle district, Monongalia county, the Moon Oil and Gas Company has started to drill a test on the William J. Lemasters farm. On Day's run, Clay district, the Day Brook Oil and Gas Company is starting a test on the D. L. Ammons farm and Festus Downs has the rig completed for a test on the D. L. Wade farm.

Southeastern Ohio. In the deep sand territory in Green township, Union Furnace district, Hocking county, O., the Haydensville Oil and Gas Company has drilled No. 5 on the National Fire Proofing Company's tract.

Keep Clarksburg dollars at home. Buy from your home merchants. Watch for special Christmas offerings in the "Buy in Clarksburg" section of the Telegram Thursday.

pany's property through the Clinton sand and is thought, after it has been given a shot, it will be good for fifty barrels a day.

In the shallow sand territory in the Caldwell district, Enoch township, Noble county, the Crescent Oil and Gas Company drilled No. 12 on the I. Ruppel farm through the Buell run sand and has a light pump.

In Olive township, White, McKelvey and Company drilled a test on the Charles Brown farm through the Berea grit and has a five barrel pump.

In Noble township, J. O. McKee and Company have started to drill a test on the A. J. Everly farm and McCormick and Blakeslee are drilling a second test on the James Stone farm. In the Reas run district, Grandview township, Washington county, C. C. Stover completed No. 6 on the A. J. McMahon farm and found nothing in any of the regular producing formations. This location is only seventy-five feet northwest of the good producer on the Phoebe McMahon farm. This well was completed two months ago and is still holding up close to fifty barrels a day.

The Oil Market.

The prices paid for oil of various grades by the purchasing agencies are:

Pennsylvania ..... \$2.09

Mercer, black ..... 1.50

New Castle ..... 1.50

Corning ..... 1.50

Cabell ..... 1.55

Chamberlain's Tablets.

This is a medicine intended especially for stomach troubles, biliousness and constipation. It is meeting with much success and rapidly growing in favor and popularity everywhere.

### THE ANGELUS PLAYER PIANO

"The Angelus Player Piano offers the possibility of producing any desired shading in expression, dynamics, and color of tone."

FRITZ KREISLER.

"There are so many wonders in the Angelus that one can only speak of the ensemble effect—it is perfect. The Phrasing Lever is marvelous, almost beyond belief, in its control of the tempo; the Melodiant brings out the melody exquisitely; while the touch and tone coloring are the height of artistry. It is incomparable."

ANNA PAVLOVA.

"My strongest impression of the Angelus is its perfect reflection of the personality of the performer. Through the Phrasing Lever, almost without conscious effort, you impart to the playing your own tempo nuances, while the Melodiant automatically brings out the melody. I find the utmost freedom in giving to it just the degree of emphasis that I desire. It seems incredible that so much in the way of music as an art can be accomplished with so little effort."

EMMA TRENTINI.

THE endorsement of the ANGELUS by three artists of world-wide distinction—Vocalist, Violinist, Premier Danseuse—each one demanding from the instrument the highest artistic qualities of widely divergent character, and all finding them in the ANGELUS in the superlative degree, is conclusive proof of the supremacy of the ANGELUS as the world's artistic player.

The ANGELUS gives you command of the piano, enabling you to play with the skill and the freedom of personal interpretation of an accomplished pianist.

This is possible because of the patented devices and exclusive features of the ANGELUS which give a control of time and melody otherwise impossible.

We cordially invite you to play an ANGELUS player piano. It will cost you nothing to try one of these wonderful instruments.
